Catalogue n° 99504

The new flail cutters **DC series** have been planned to be used on skid loaders with an oil flow rate (PTO) of at least 75 l/m.

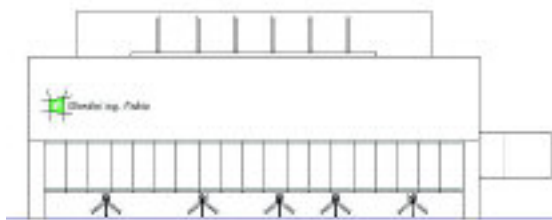

There are three models available, with an operational width of respectively 1.300, 1.600 and 1.900 mm.

The hydraulic flail cutter **DC series** is equipped with a pair of “Y” shaped knives and a third one located in the middle, which allows it to reduce all the treated material to fine grains. All the knives are heavy and they are able to crush down shrubs with a maximum diameter of about 80 mm.

You can use the flail cutter **DC series** on skid loaders, thanks to the **UD series** connection plate, which was created according to Bobcat’s standards.

Technical specifications table of the flail cutter DC series				
Model	Oil flow rate required [litri/min]	Maximum Pressure [bar]	Weight of the bush cutter [kg]	Operational width [mm]
<b>DC 13</b>	75	250	400	1.300
<b>DC 16</b>	90	250	500	1.600
<b>DC 19</b>	100	250	600	1.900
